

COURSE CONTENTS

2	INTRODUCTION FOR ORD INTERFACE	(1,25h)	7	CORRIDOR EVALUATION	(1,25h)
2.1	How to start?	A,B,C	7.1	Dynamic cross sections	A,B,C
2.2	Ribbons and workflow tabs	A,B,C	7.2	Sight evaluation	B,C
2.3	Seed file	A,B,C	7.3	Aquaplaning	(B)
2.4	Co-ordinate system	A,B,C	7.4	Offset report	(B)
2.5	Mouse clicks	A,B,C			
2.6	Element selection	A,B,C	8	QUANTITIES IN CORRIDOR	(0,75h)
2.7	Level display	A,B,C	8.1	Quantities methods for corridor	(B)
2.8	DDA-levels	A,B,C	8.2	Component quantities	B
			8.3	Quantities shown in cross sections	B
3	TERRAIN MODEL	(1→6h)	8.4	Quantities by Named Boundary	B
3.1	Terrain model from graphics	A	9	SUPERELEVATION	(1,25h)
3.2	Terrain display	A	9.1	Create DGN file for Superelevation	C
3.3	Terrain from DTM	A,B	9.2	Superelevation creation	C
3.4	Terrain from ASCII	A	9.3	Superelevation evaluation	C
3.5	Graphical filter	A	9.4	Assigning Superelevation to corridor	C
3.6	Terrain model from elevation texts	(A)	9.5	Changing the geometry	C
3.7	Terrain model from point cloud	(A)			
3.8	Modify Terrain	A	10	DRAWING PRODUCTION	(1→2h)
3.9	Terrain for topsoil sub level	A	10.1	File structure	B
3.10	Quantity between terrain models	A	10.2	Profile drawing	A,B,C
3.11	Showing cut and fill	A	10.3	New Annotation Group	C
3.12	Clipped terrain model	(A)	10.4	Modify title block	(B)
3.13	Combining terrain models	(A)	10.5	Cross Section drawing	(B)
3.14	Delta surface	A	10.6	Plan drawing	(B)
3.15	Excavation for foundation w. Linear Temp	A	11	CIVIL CELLS	(1h)
3.16	Designing 3D elements	(A)	11.1	Intersection Civil Cell	B,C
3.17	Export Terrain model to exchange format	A	11.2	Basin Civil Cell	(A,B,C)
3.18	Convert Terrain model to Mesh	A			
4	HORIZONTAL GEOMETRY	(0,5→2h)			
4.1	Horizontal alignment f. graphic elements	A	12	CREATING TEMPLATES	(1,5h)
4.2	Horizontal alignment w. Design Standards	B,C	12.1	The Create Template dialog box	C
4.3	Import or export geometry	(B)	12.2	Test a Template	C
4.4	Horizontal alignment from elements	B	12.3	Template Points	C
4.5	Editing horizontal alignment	C	12.4	Create a new Template	C
4.6	Stationing text as graphical element	A,B,C	12.5	Typical Cross Section	C
4.7	Connecting elements	C	12.6	Linear Template	C
5	VERTICAL GEOMETRY	(0,75→1h)	12.7	Surface Template	C
5.1	Vertical alignment for path	(B)	13	SITE TOOLS	(0,25h)
5.2	Vertical alignment along terrain	(B,C)	13.1	Parking lot	A
5.3	Vertical alignment for road	B,C			
5.4	Editing vertical alignment	(B,C)	14	RAIL	(1→8h)
6	CORRIDOR	(1,5h)	14.1	Rail tools	D
6.1	Create Corridor	B,C	15	DRAINAGE & UTILITIES	(2,5 h)
6.2	Corridor Stages	B,C	15.1	Utilities	D
6.3	Corridor assistance files and Point Contr	(B),C	15.2	Trench	D
6.4	Slope signature	(B,C)	15.3	Dynamic Cross Sections	D
6.5	Export road model	(B,C)	15.4	Duct pipe	D
6.6	'Killing' the Civil data	(B,C)	20	Appendix and tips	(A,B,C,D)
(A)	Course Day - focus on terrain modelling		(C)	Course Day - focus on advanced road modelling	
(B)	Course Day - focus on intro and overview		(D)	Workshop Day - focus on special tools
